

How can a reducing agent give you more?

Vitride* gives you...

Strength and Selectivity

Versatility life science innovation demands

Vitride* delivers powerful hydride reduction and allows for partial reductions with more customized control than LiAlH_4 .

Advantages over other reducing agents

More to offer your operation

Compared to typical reducing agents, Vitride* is soluble in a variety of solvents—more soluble than LiAlH_4 . Plus, it's easier to handle and less moisture-sensitive, with improved storage stability under dry conditions.

Stability

Easy-to-handle and store for robust shelf life

A liquid formulation for precise addition, non-pyrophoric Vitride is thermally stable to 170°C and is not oxygen-sensitive.

With optimized capacity and improved production from Vertellus, discover how Vitride* is ready to support your life science operation.
